

■ Feed Grade Collagen

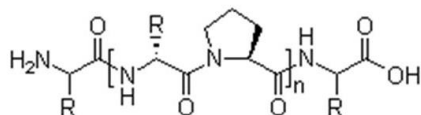

Introduction

Product properties: Light beige to yellow, powder form, soluble in water. Peptone is extracted from poultry cartilage, by using modern biological technology, to production new nutrition food products.

Functions: Collagen is extracted from poultry cartilage, by using modern biological technology, collagen of feed grade containing 18 kinds of amino acids, the protein content is more than 90%, high nutritional value, strong function, collagen is a good natural physiological activity substance. The collagen can be used to pet food, animal feed, aquatic feed, etc. It has a high rate of absorption and conversion, so dramatically reducing feeding cost, improving the rate of feed effect.

Ingredient

Product Name	Feed Grade Collagen
CAS	9064-67-9
MF	C ₄ H ₆ N ₂ O ₃ R ₂ .(C ₇ H ₉ N ₂ O ₂ R) _n
MW	
MS	

Item and Standard

ITEM	UNIT	STANDARD
Appearance		White powder
Odor		None
Loose Density	g/ml	≥0.20g/ml
Protein	%	≥90%
pH		5.0-7.5
Moisture	%	≤5.0%
Ash	%	≤2.0%
Average molecular weight		≤5000

Heavy Metals	mg/kg	Pb , ≤1mg/kg
		Cr , ≤2mg/kg
		As , ≤0.5mg/kg
		Hg , ≤0.1mg/kg
Bacterial Count		≤1000cfu/g
Coliforms		≤ 30cfu/g
Mold &Yeast		≤ 50cfu/g
Pathogenicbacteria		Negative

Application

1. Fermentation
2. Fertilizer
3. Animal feed
4. Extracting Amino Acid
5. Medium

Packaging

25KG

Storage

Please reading safety data sheet before carrying or using the product.
Cool and dry, keep tightly closed, quality guarantee period is two years.
