

Betaine Hydrochloride

Introduction

Properties: betaine hydrochloride is a group of organic compounds, white to yellow crystalline powder, sour taste, with moisture absorption, soluble in water, ethanol, difficult to dissolve in ether, trichloromethane, alkali reaction. Betaine hydrochloride is a high efficiency, high quality, economical and widely used in animal, poultry and aquaculture

Ingredient

Product name	Betaine Hydrochloride
CAS	590-46-5
MF	C5H12ClNO2
MW	153.6070
MS	

Item and Standard

ITEM	UNIT	STANDARD
Appearance		White crystalline powder
Assay(dry basis)	%	≧ 98%
Loss on drying	%	≧ 1.0%
Residue on ignition	%	≧ 1.0%

Source Product

Betaine is a non-essential nutrient found in many food sources, including beetroot, wheat bran, rye, barley, spinach, quinoa, brown rice, sweet potatoes, Turkey breast, beef, veal, and some seafood, such as shrimp. It was originally found in beets, from which betaine gets its name.

Application

- ▶ Food
- ▶ Feed Additives

Package

25kg

Storage

Please reading safety data sheet before carrying or using the product.
Cool and dry, keep tightly closed, quality guarantee period is two years.
